## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21, drawn to an improved therapy to prevent premature labor, preventing premature rupture of membranes and/or improving the outcome of preterm deliveries in a pregnant animal by effecting the presence of a free radical scavenger, classified in class 514, subclass 1 (minimally, see below).
- II. Claim 22, drawn to method of detecting *in utero* formation of free radicals, classified in class 424, subclass 9.1.

The methods of inventions I and II require different products and steps and have different endpoints. Therefore, inventions I and II are patentably distinct.

In addition, invention I is directed to patentably distinct and/or independent molecules, *i.e.* glutathione (class 14, subclass 18), N-acetylcystine (class 562, subclass 556), b-carotene (class 568, subclass 824), vitamin C (class 549, subclass 315) and vitamin E (class 549, subclass 408). Absent factual statement/evidence to the contrary, each different molecule is considered distinct and/or independent, one from the other on the basis of physical, chemical and biological properties and function(s) (see also the enlarged list in claim 19). Thus, where invention I is elected, under 35 USC 121 an additional election under 35 USC 121 is required as to one recited in claim 19. This selection of the molecule is not a species election.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

***Advisory Information***

A telephone call was made to Daniel Hodgins (202-978-7700) on July 1, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sheridan K. Snedden whose telephone number is (703) 305-4843. The examiner can normally be reached on Monday - Friday, 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christopher Low can be reached on (703) 308-2923. The fax phone numbers

for the organization where this application or proceeding is assigned are (703) 746-3975 for regular communications and (703) 746-3975 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
